

Vincent Report. Who is the Reporter? Vincent. Who is Vincent? You are ... I am.

- Do we have the form of government we ignore or tolerate?
- How can they represent us, if we don't know them, and they don't know us?
- How can we direct them if we do not know their challenges and what is happening in our state, counties, cities, hospitals, schools, water districts, etc.?
- Are "We the People" the problem or the solution? It's a choice.

- The Vincent Report is a system that connects you to your representatives and them to you as their constituent. You are not just a name on a witness list, a subject of a docket, or a social media post!
- The Vincent Report empowers existing groups or individuals by putting eyes on the issues. Vincent can help unify missions across multiple advocacy efforts. Vincent helps "colonies", to organize their petitions, to submit votes and opinions, to submit emails that can be viewed by all members in Vincent's outbox and inbox that are sent to officials to "help them, help us."
- Vincent provides tools that streamline access to representatives and local financial data that are essential for transparency. You can quickly access their offices, committees, and media information, etc. Vincent tracks debt loads that fund county, hospitals, cities, schools, water districts, agencies, courts, and all government entities, which we directly pay for in taxes and rent.
- Vincent maximizes the People's impact by activating the key factor of **Actionable Engagement**. Moving past simple awareness to give individuals clear, effective pathways to voice their concerns and influence decisions that govern us all.

The name "Vincent" has its origins in Latin and is derived from the word "vincens," which means "conquering, winning, occupying", exactly what we hope to empower us all to accomplish.

To conquer deception and injustice ~ To win hearts and minds ~
To occupy in love, joy, and peace.
