

Below are two requests for legislation due to misinformation by the American Red Cross that jeopardizes the health and safety of Texas citizens regarding blood transfusions.

“According to American Red Cross, **they don't label blood products as containing vaccinated or unvaccinated blood as the COVID-19 vaccine does not enter the bloodstream & poses no safety risks to the recipient.**” ... “While the antibodies that are produced by the stimulated immune system in response to vaccination are found throughout the bloodstream, the actual vaccine components are not,” **said** Jessa Merrill, the Red Cross director of biomedical communications.”

The following are comments from the [December 7, 2022 hearing by US Senator Ron Johnson on COVID-19 injections with minute markers \(MM\)](#) noted.

MM 2:39:55 - Dr. Robert Malone, MD pioneer of mRNA technology. **"The data clearly demonstrated in the animal model, that the encoded protein went everywhere."** MM 2:44:54 - **"Yes, it appears to be very long-lived."**

Note: If a needle goes in and blood comes out, whatever was in the needle is in contact with the blood.

There is growing need and should be a patient right to determine what Emergency Use Authorized product (aka COVID-19 vaccine) status of the blood they receive.

1. Right to Direct Blood Donations.

In the anticipation of a medical procedure that may result in the need of a blood transfusion, patients shall be granted the right to designate blood donors for themselves or for those whom they have guardianship over. Therefore let it be resolved that all hospitals in the state of Texas shall allow for direct blood donations for designated patient blood transfusions.

2. Labeling of Blood Donations.

Blood donation products shall be labeled and indicate the donor's status and lot number of any Emergency Use Authorization (EUA) product (aka vaccine) they have received or indicate not vaccinated (NV). Patients receiving blood donations shall have the right to specify what status of EUA product (aka vaccine) blood donation they receive.
