Please. Nice to see you. Yes, thank you. Sheila, you waited.

Thank you. My name is Sheila Hemphill, and I'm CEO of Texas Right to Know, and I'm also [the curator for the Vincent Report](#), oh, I'm sorry, did I have my EMF detector on? Thank you. You won't need it for the 765 lines. You won't need a detector. You'll hear it all on your own. And if anyone would like to take this home overnight, I can pick it up tomorrow, and you can hang out with this kind of noise that's in our environment. **Now, maybe your ears don't hear this all the time, but I assure you, your cells do, because the 2013 Global Medical Research Award, Dr. Martin Pall, showed the mechanism of wireless frequency is in your voltage-gated calcium channels, and they're all over your body.** Now, back to this document. It's upside down. There you go. You're still awake. There's a check. I'm following you. **I'm following you.**
