

CALL TO ACTION:

Immediately halt any promotion or mandates of any products licensed under Emergency Use Authorization (EUA) and any future EUA mandates.

Under a "Public Health Emergency of International Concern" declaration, the following federal laws supersede health protections we assume are in place but are not.

Per pg 9-10 American Domestic Bioterrorism Program by Katherine Watt.

- The use of products licensed under **Emergency Use Authorization (EUA)** like Covid-19 vaccines, masks, PCR test, etc., "shall not be considered to constitute a clinical investigation - **EUA products are exempt from laws regulating the use of investigational, experimental drugs or devices on human beings.**" Federal Food Drug and Cosmetics Act, 21 USC 360bbb- 3(k). 1997, 2004, 2005, 2013.
- Under EUA, **there are no required standards for EUA product safety**, Federal Food Drug and Cosmetics Act, 21 USC 360bbb-3(c)(2)(A). 1997, 2004.
- Under EUA, the **only standard for establishing the efficacy** of a EUA product **is a declaration by the HHS Secretary that a product "may be effective."** Federal Food Drug and Cosmetics Act, 21 USC 360bbb-3(c)(2)(A). 1997, 2004.
- Under EUA, **there are no informed consent duties** for those who administer or rights for those who receive the EUA products **to provide risk and benefit information and obtain consent.** 21 USC 355(i)(4), for drugs, and 21 USC 360j(g) (3), for devices. 2016. Therefore government's promotions of EUA products are exempt from required public disclosure of potential side effects or adverse events in their promotion of the EUA product, which IS required by law for the promotion of FDA-approved drugs.
- Under EUA, **products have no labeling requirements** regarding the contents or ingredients in the marketing of EUA products like Covid-19 vaccines. Federal Food Drug and Cosmetics Act, 21 USC §360bbb-4. Countermeasure development, review, and technical assistance.
- Under EUA, **there are no eligible consumer fraud claims** because the only legal party to the financial transactions is the Department of Defense (DOD) as the buyer of the injections;

Despite the government's gross misrepresentation that if you are vaccinated, you will not be infected nor infect others, military and medical workers continue to be coerced to receive the COVID-19 shot or lose their jobs.

Given that through November 25, 2022, there have been 1,471,557 adverse events and 32,508 deaths reported in the Vaccine Adverse Events Reports System (VAERS) from the COVID-19 gene editing technology, the **following events further prohibit the US public from having any civil or criminal recourse for protection against "unlawful" acts which are now deemed "lawful" under EUA declarations, i.e. false assurance of "Safe and Effective" with no disclosure of known risks.**

1. Changes to federal laws during "Public Health Emergencies of International Concern", such as those in the PREP Act, have **suspended US citizens' constitutional rights and provided complete indemnification for all "covered parties"**, except in cases of fraud. See The American Domestic Bioterrorism Program.
2. In May 2020, South Bay United Pentecostal v. Gavin Newsom case, the SCOTUS **Chief Justice Roberts gave "stand down" directions to federal judges to "owe significant deference (submission) to politically accountable officials" involving "state of emergency" actions.**
3. Pfizer admits to fraud but states in the whistle-blower case of BROOK JACKSON V. VENTAVIA RESEARCH GROUP, LLC; PFIZER INC., that the case should be dropped based upon opinions from the 2016 SCOTUS case which ruled, **"if the government continued paying a contractor despite the contractor's fraudulent activity, the fraud was not considered "material" to the contract"**
4. In the Robert v. Austin case appeal documents, claims assert that **individuals whose DNA is altered due to the gene editing mRNA COVID-19 injections would deem the individual as chattel property under current 2013 SCOTUS rulings and thus be a violation of the 13th Amendment against slavery.**

"All the vaccine mandates should be dropped immediately. We need immediate funding for vaccine injury centers of excellence across the United States for screening, detection, diagnosis, prognosis, and management.

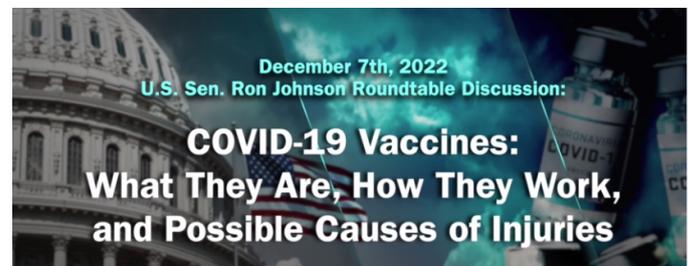

We need a massive shift in our healthcare system toward managing now this large number of vaccine-injured people. What's at stake here is death."

Dr. Peter McCullough, MD on vaccine mandates during the December 7, 2022, Senate Hearing by US Senator Ron Johnson

TEXAS RIGHT TO KNOW

More Unites Us Than Divides Us

TESTIMONY SUBSTANTIATING THE NEED TO HALT ANY PROMOTION OR MANDATES OF EUA COVID-19 INJECTIONS

<https://rumble.com/v1ze4d0-covid-19-vaccines-what-they-are-how-they-work-and-possible-causes-of-injuri.html> with minute markers (MM)

- **MM 1:32:50 - Del Bigtree**, Informed Consent Action Network, shows a video of false information being disseminated by government representatives (Anthony Fauci/NIAID, Rochelle Walensky/CDC, President Biden, etc.) and mass media (MSNBC, CNBC, etc.) that a person who is vaccinated will not be infected nor infect another person, which is proven by data and common knowledge to be completely false.
- **MM 1:36:00 - Rob Roos**, a Dutch member of the European Parliament, questioning Janine Small President of International Developed Markets, Pfizer, October 10, 2022. "Was the Pfizer COVID vaccine tested on stopping the transmission of the virus before it entered the market?" asked Rob Roos. Janine Small, "Regarding the question around, did we know about stopping humanization before entering the market? NO! We had to really move at the speed of science to really understand what is taking place in the market. And from that point of view, we had to do everything at risk."
- **MM 2:26:53 Dr. James Thorp, MD**, Maternal/Fetal Medicine expert statements from his review of 1366 peer-reviewed medical journal publications. "What I've seen in my clinical practice has been a substantial, massive, increase unprecedented in menstrual abnormalities. prior to pregnancy, and a substantial increase in infertility. A substantial increase in miscarriage, fetal death, and fetal malformation. ... I've published many studies over the last two years our latest study with reviews from VAERS and CDC data and we compared the COVID-19 vaccines over the last 15-18 months with those of the influenza vaccine in pregnancy. ... But what I will say is that the CDC and the FDA, look for a two-fold increase as a danger indication. What our study showed was not two-fold increases, but see 50, 100, or 1000 increases in menstrual abnormalities, for example, almost a 1200-fold increase compared to the influenza vaccine. ... 58-fold increase in miscarriage from the COVID-19 vaccines compared to that of the influenza vaccine. ... Fetal death 38-fold increase." MM 2:52:55 - "In 2020 when we have a massive assault with COVID-19, we didn't have an increase in stillbirth. That stillbirth rate actually dropped down to 5.73 for about 5.83 per 1000 births, which was the aggregate three prior years. ... The rise was not seen until after the vaccine. I have vital statistics from our National Vital Statistics to prove that."
- **MM 2:15:06 Dr. Kirk Milhoan, MD** UCLA trained pediatric cardiologist regarding on myocarditis in children. "A study was recently published in The Lancet Child and Adolescent Health. It shows the outcomes of at least 90 days since the onset of myocarditis after mRNA COVID vaccination in adolescents and young adults in the USA. And what they found was pretty alarming. What they showed was that if they looked at the echocardiogram and EKG, those all went back pretty close to baseline in the majority of patients. And that's what you often hear. 'Oh, the EKG was normal.' 'Oh, the echocardiogram was normal or the blood test to see if the heart was inflamed, the troponin, it's all back to normal.' However, if they dug a little deeper, what they saw was that the if they looked with a cardiac MRI, one of our most sensitive tests to look for damage to the heart, they saw that in 151 kids who had an MRI at 90 days, 81 of them still had damage to their heart and the damage was of late gadolinium enhancement, which is associated with SUDDEN CARDIAC DEATH! I am passionate for the health of our children."
- **MM 2:39:55 - Dr. Robert Malone, MD** pioneer of mRNA technology. "The data clearly demonstrated in the animal model, that the encoded protein went everywhere." MM 2:44:54 - "Yes it appears to be very long-lived." MM 2:46:08 "This study clearly demonstrates that the level of spike protein produced from the vaccine is significantly higher than the levels observed from natural infection. ... this infection starts gradually, ... building up as the immune system kicks in and controls in the case ... In the case of the vaccine, ... you get a whole lot of protein produced circulating in the body ... it is very different. Spike protein spike is a toxin and is significantly higher with the vaccine product."
