Pandemic Response

Good morning. My name is \_\_\_\_\_ from \_\_\_\_\_  
in \_\_\_\_\_ County.

You have just received another copy of the Omega Brief, which was also delivered to every Texas House Representative, Speaker, State Senator, the Lt. Governor, Governor and the Attorney General in mid August.

This document is a transcription of a July 2021 interview between international trial lawyer Reiner Fuellmich, and Dr David Martin. Reiner Fuellmich is leading the world's case regarding charges of Crimes Against Humanity and David Martin's company has been reviewing patent's worldwide for 20 years in 168 countries.

The Omega Brief contains irrefutable evidence of COVID collusion between CDC, NIH, NIAID and the COVID-19 vaccine manufacturers. The back 30 pages of the brief is David Martin's Fauci COVID-19 dossier, which identifies nine federal charges for criminal conspiracy and racketeering.

The full interview can be read and heard on the website: [TheOmegaBrief.com](http://TheOmegaBrief.com)

This Brief is color coded to indicate sections and severity of content contained in the transcript as determined by the author of the brief,

Black Bolded -significant

Red bolded - shocking

Red bolded and underlined - alarming.

For Example: "In 1999, Anthony Fauci funded research at the University of North Carolina, Chapel Hill ... where the NIAID built "an infectious replication defective coronavirus" that was specifically targeted for human lung epithelium. In other words, we made SARS and we patented it on April 19, 2002." Patent 7279327 was mysteriously transferred from the University of North Carolina Chapel Hill to the National Institutes of Health in 2018.

The pages with a green sidebar contain the full transcript, while pages with the red sidebar are highlights from paragraphs in the word for word transcription.

This brief is being delivered to many County Commissioners, Sheriff's, City Councils, School Districts and Public Health Departments so we can all be reading the same words that are not opinion because patents are not debatable.

It is critical for this committee to be brave enough to identify the guilty parties responsible for this pandemic corruption and stop them or they will continue.

Good morning. My name is \_\_\_\_\_ from \_\_\_\_\_

I would like to direct your attention to The Omega Brief, red bar, page 6, item 23, 25, and 30.

...

Per Dr. Martin:

On February 12, 2016, in the publication of the National Academies of Press, Peter Daszak, head of EcoHealth Alliance, who has received of millions of dollars from NIH funding stated,

“We need to increase public understanding of the need for medical countermeasures such as a pan coronavirus vaccine. A key driver is the media, and the economics will follow the hype.... We need to use that hype to our advantage to get to the real issues. Investors will respond if they see profit at the end of the process.”

This same Peter Daszak, was independently corroborating the Chinese non-lab leaked non-theory because there wasn't a lab leak this was an intentional bioweaponization of spike proteins to inject into people to get them addicted to a pan coronavirus vaccine.

At a conference called SARS and Bioterrorism, MERCK introduced the notion of what they called, "The New Normal" which is the language that became the branded campaign that was adopted by the World Health Organization in 2020.

The Global Preparedness Monitoring Board, which the Chinese director of Center for Disease Control, along with Bill Gates's, Dr. Elias of the Gates Foundation and Anthony Fauci all sat together on that board of directors.

but the first introduction of “The New Normal” campaign which was about getting people to accept a universal pan influenza, pan coronavirus vaccine was actually adopted January 6 2004.

The vast evidence of collusion wrecks of premeditated intent to create a world pandemic.

Let's continue in The Omega Bar, red bar section, page 7.

Moderna knew that it was going to be placed in the front of the line with respect to the development of a vaccine in March of 2019. ... their term, "deliberate release of coronavirus." ... in November they entered into a research and cooperative research and development agreement with UNC Chapel Hill with respect to getting the spike protein to put inside of the lipid nanoparticle. So that they actually had a candidate vaccine, before we had a pathogen allegedly that was running around.

Anthony Fauci lamented the fact that he could not find a way to get people to accept the universal influenza vaccine. ... March of 2019 in the amended patent filings of Moderna, we see that there is an epiphany that says, "What if there was an accidental or an intentional release of a respiratory pathogen?"

Recited in the book, "A World At Risk", which is the scenario that was put together by the World Health Organization in September of 2019. So, months before there's an alleged pathogen, which says that we need to have a coordinated global experience of a respiratory pathogen release, which by September 2020, must put in place a universal capacity for public relations management, crowd control, and the acceptance of a universal vaccine mandate. That was September of 2019. And the language of an intentional release of a respiratory pathogen was written into the scenario that quote must be completed by September 2020.

But it's Moderna's patent applications that were amended in March of 2019 to include the deliberate release of a respiratory pathogen language.

According to the World Health Organization, we had eradicated coronavirus as a concern, so why having eradicated it in 2007 and 2008, why did we start spending billions of dollars globally on a vaccine for a thing that had been eradicated by declaration in 2008?

Good morning. My name is \_\_\_\_\_ from \_\_\_\_\_

Let's continue in The Omega Brief, red bar section, bottom of page 7.

This is a tool and in the interest of DARPA in creating a biological weapon ... a tool for everything else that latches on to this including population control for example.

There is no question that by 2005 it was ... a weapon of choice.

We are injecting a spike protein mRNA, secret mRNA sequence, which is a computer simulation. It's not derived from nature. ... which has been known and patented for years.

The ludicrous nature of the story is that this is somehow prophylactic or preventative ... Because the evidence makes it abundantly clear that there has been no effort by any pharmaceutical company to combat the virus. This is about getting people injected with the known to be harmful S1 spike protein.

Anthony Fauci tried desperately to get some of his quote "synthetic RNA vaccines" published, he had his own patents rejected by the patent office. Anthony Fauci himself was told by the patent office themselves, that what he was proposing, as a vaccine, does not meet the patentable standard, the legal standard, or the clinical standard.

Hundreds of millions of people who are being injected with a pathogen stimulating computer sequence, which is being sold under what the patent office, what the medical profession, and what the FDA, in its own clinical standards, would not suggest is a vaccine. But by using the term, we actually are now subjecting hundreds of millions of people, to what was known to be by 2005, to be a biological weapon.
