

Claudio Pedrazzini: Member of the Chamber of Deputies **“The Covid-19 hit me, thanks to the ozonated-oxygen I am healed”**

April 10, 2020 Orbisphera.org – Italy

The Honourable Claudio Pedrazzini, a member of the Mixed Group of the Chamber of Deputies, was the first Italian Member to be found positive at Covid-19.

Interviewed by "Orbisphera", he spoke about his experience:

"On Friday 6th and Saturday 7th March I had a small fever that came and went. On Monday, March 9th I had a temperature of 37.5 degrees Celsius which remained constant. So I decided to take the test immediately and the next day they told me I was positive. I immediately informed the Chamber of Deputies and went into quarantine.

During the next five days I had a high fever above 38 degrees (100.4 F) and I was feeling short of breath.

The Covid-19 virus was attacking my lungs.

I already knew the benefits of oxygen ozone therapy, which is why I immediately did two large auto-heminfusions (GAE) in a few days, consisting of taking a quantity of blood that is ozonized and reinfused.

Together with the GAE, I drank three or four glasses of ozonized water every day.

I also did respiratory exercises several times a day.

Within 9 days, after practicing four GAE, drinking the ozonized water and doing breathing exercises, the fever disappeared, as did the feeling of shortness of breath. And all medical parameters returned to normal.

On March 24 and 26 I took two consecutive swabs, the results of which confirmed my complete recovery. There is no more trace of the Covid-19 virus and the state of health is excellent.

I can say with certainty that the oxygen ozone has been instrumental in making me recover quickly.

I was already familiar with the properties of ozone therapy and I used it as a precautionary measure because I had a heart problem at the age of four.

When the Covid-19 infection occurred, I immediately thought of using ozone oxygen.

The virus attacks the microcirculation of the lungs, heart, liver and kidneys. I knew the studies and the good results of ozone oxygen to heal people with severe pneumonia.

I had listened with great interest to the report that Prof. Marianno Franzini, International President of SIOOT (Scientific Society of Ozone Oxygen Therapy), had given at the Social Affairs Commission of the Chamber on July 4, 2019.

On that occasion, Franzini had illustrated the results of oxygen ozone therapy to combat antibiotic resistance. One of the cases shown referred to a patient with very serious pneumonia.

For this reason, as soon as I tested positive, I immediately had a GAE performed.

Covid-19 is a virus that must be tackled as soon as possible with ozone oxygen, it must be neutralized immediately to avoid the harmful effects of the infection that lead people to worsen to the point where they need intensive therapy.

Oxygen ozone therapy has made a significant contribution to my recovery, and has done so much less quickly than expected.

For these reasons, I believe that it is necessary to make ozone therapy, as per the protocol of the Scientific Society of Ozone Ozone Therapy (SIOOT), known and practiced by as many doctors as possible.

Ozone therapy is highly effective, has very low costs, limits the disease course time and has no secondary or residual effects.

I know that many doctors are not familiar with oxygen ozone therapy, and that there are also prejudices. I believe that it is time to overcome them and practice ozone therapy in a broad and widespread way: in this way we can bring down Covid-19 effectively and quickly".
